FLAB FUNDS SICAV - FLAB CORE - CL - USD - HDG - CAP. (ISIN: LU1805616684)

A Sub-Fund of FLAB FUNDS SICAV, managed by Casa4Funds SA

• OBJECTIVES AND INVESTMENT POLICY

We aim to achieve **long term growth in your capital**. Our objective is to **maximise your return in comparison to the risk** we take.

Under normal conditions, and based on our return and risk targets, we implement a strategic allocation of the portfolio between bonds, shares and cash. We use two statistical models to determine the weight of investments in the aforementioned categories. First, a model determines the weight of shares in the portfolio (Stock/Bond Model). Then, the balance is split between bonds (loans) and cash based on the reading of the Bond/Cash Model.

We mainly invest in Exchange Traded Funds (ETFs, investment funds listed on stock exchanges) which may invest in all asset categories and countries. We may also invest directly in bonds (including Contingent convertible bonds ("CoCos") as further described in the Prospectus) and shares, and indirectly in commodities.

This share class does not distribute any income to you.

You can buy and sell shares of this class every bank business day in Luxembourg.

• RISK AND REWARD PROFILE

Lower risk Higher risk
←—————→
Typically lower rewards Typically higher rewards

The above indicator reflects the historical level of risk and reward of this share class over the last 5 years. As it is based on its historical behaviour, **it does not necessarily reflect your future risk, nor reward**.

This share class is classified as above, since it has experienced **moderate movements in its price**. This classification is solely valid as of the date of this document; it can change in the future.

If you invest in a fund in the category "1" above, you may sustain a loss. A fund in this category is not risk-free at all times.

This fund does not provide you with any guarantee on performance nor on the value of your investment in it. The latter may consequently go up, as well as down.

The indicator captures the impacts on the Fund of adverse movements in financial markets and currencies, **under normal market conditions**.

The **following other risks can be significant** to the Fund:

- The funds, bonds and shares in which we invest may

be easily sold under normal market conditions.

Exceptional circumstances may lead to situations where those can only be sold at a loss for you;

- Investment positions may be relatively focused on one particular economic sector or country;

- Investing in emerging economies can present risks inherent to political stability, economic conditions, and/or regulatory and fiscal environments that may adversely affect the price of the Fund;

- The protection of your investment against fluctuations in the foreign exchange rate of the U.S. dollar against the euro may not be perfect. You may therefore sustain a loss as a consequence of this protection.

More details on the risks you may face when investing in this Fund are described in the "Risk Factors" and "Risk Management Process" sections of the Prospectus, as well as in the "Sub-Funds Details" section thereof.
